## Understanding

**When you talk to professionals about your health, it is very important that communication works. If your own language skills are not good enough, an intercultural interpreter will help you.**

Intercultural interpreters translate the content of a conversation with a specialist orally for you. As a result, there are fewer misunderstandings. A professional translation is particularly important when it comes to health.

Only in exceptional cases should relatives or acquaintances have them translated.

Many hospitals, schools and social institutions offer free intercultural interpreting.

### Find help

#### Find an interpreter

Get professional help for interpreting
